MESSAGE FROM THE HEAD OF SCHOOL

Welcome to the School of Education and the University of Adelaide.

The School of Education is one of the most innovative educational research intensive schools in Australia.

Our Master of Education is an evidence-based postgraduate program with a focus on contemporary learning and teaching. Our Alumni are demonstrating significant impact on the broader education community in South Australia, across Australia and also internationally. We welcome students with a wide variety of backgrounds and experiences.

Our unique Master of Education is based on cutting-edge research, ensuring this professional degree is suitable for educators who aim to:

- lead evidence-based approaches to transform education outcomes positively
- inspire and lead the creation of safe, inclusive and innovative learning environments

- learn about the latest educational research and how this can be applied immediately in the workplace
- lead and engage diverse communities by inspiring exemplary cultures of learning, professionalism and respect.

We offer face-to-face classes, blended online learning, workshops and intensives - enabling you to learn flexibly and at your own pace. By enrolling in the Master of Education, you will learn about the latest educational research and how this can be applied immediately in the workplace.

I look forward to meeting you.

Professor Faye McCallum
Head of School of Education
The University of Adelaide

WHY THE UNIVERSITY OF ADELAIDE?

The [University of Adelaide](#) is a world-class teaching and research institution. We pursue innovation and prepare the leaders of tomorrow.

OUR NOBEL LAUREATES

The Nobel Prize is an international award given yearly since 1901 for achievements in physics, chemistry, medicine, literature and peace. The University of Adelaide is associated with five Nobel Laureates, and has a long history of groundbreaking research and scholarship of international significance.

1915

Sir William Henry Bragg and William Lawrence Bragg:
Physics

For their services in the analysis of crystal structure by means of X-rays.

2003

John M Goetzee:
Literature

For his contribution to literature.

1945

Sir Howard Walter Florey:
Physiology or Medicine

For the discovery of penicillin and its curative effect in various infectious diseases.

2005

Dr J Robin Warren AC:
Physiology or Medicine (joint)

For his discovery of the bacterium *Helicobacter pylori*, and its role in gastritis and peptic ulcer disease.

As Australia's third oldest university, we have a well-established reputation for excellence and progressive thinking, and are proudly ranked among the top 1% of universities worldwide.

We recognise exceptional people as one of our greatest assets. Adelaide has 110 Rhodes Scholars and five Nobel Laureates among its distinguished alumni. We attract talented staff to guide the best and brightest students.

We are committed to developing quality graduates who are recognised for their skills, creativity, global outlook and ability to succeed. Students learn from academics who are global leaders in their field and international counterparts from over 100 different countries - providing the opportunity to build strong global networks.

MASTER OF EDUCATION

Lead educational change and innovation

Our Master of Education focuses on six areas of specialisation. To complete a specific specialisation, you need to complete all four courses in one of the following areas:

- **Educational Leadership and Innovation:** Strengthen your knowledge and understanding of leadership and management theory and its application in education to lead change.
- **Wellbeing:** Examine evidence-based approaches to wellbeing in education. For all educators working in education settings.
- **Entrepreneurship Education:** Develop your knowledge and understanding of entrepreneurship and innovation and its impact on education, schools and systems.
- **Science, Technology, Engineering and Mathematics (STEM) Education:** Investigate issues and opportunities facing education in the areas of STEM and discover how to increase levels of student engagement.
- **English Language Teaching (ELT/ TESOL):** Learn the latest strategies to become an effective educator of English Language Teaching (ELT).
- **Research:** Strengthen your understanding and skills in educational research with the option of going on to a PhD.

Outcomes

The Master of Education is for professional educators who aim to:

- develop and extend their leadership and management positions within a diverse range of educational settings
- become policymakers in government, not for profit and non-government educational agencies
- undertake extended professional development and expertise in a range of specialisations
- undertake higher research in the future .

When you complete this program you will be able to:

- lead evidence-based approaches to transform education outcomes positively
- prepare to teach in higher education
- inspire and lead the creation of safe, inclusive and innovative learning environments
- lead and engage diverse communities by inspiring exemplary cultures of learning, professionalism and respect.

Core courses

Students without an existing teaching qualification must complete core courses to the value of 30 units comprising of:

- [Educational Leadership in Diverse Contexts](#)
- [Education Major Project](#)
- [Education Policies and Systems](#)
- [Curriculum Development and Innovation](#)
- [Pedagogical Engagement for Learning](#)
- [Assessment and Evaluation](#)
- [Research Design](#)
- [Introduction to Wellbeing in Education](#)

Recognition of Prior Learning

Students granted one year of prior learning complete core courses to the value of 9 units, comprising of:

- [Research Design](#)
- [Education Major Project](#)

EDUCATIONAL LEADERSHIP AND INNOVATION

Strengthen your knowledge and understanding of leadership and management theory and its application in education to lead change.

About

Leadership is recognised as one of the critical drivers for educational improvement. This specialisation emphasises evidence-based strategies to build your self-awareness and leadership capability to lead educational change. You will focus on the self-reflection and self-regulation essential for leadership in challenging circumstances. We'll cover the latest findings and change processes including appreciative inquiry and positive organisational scholarship to build sustainable change in diverse educational settings.

Educational Leadership and Innovation courses include:

- Leading Self and Others
- Leading Positive Change
- Leading Wellbeing
- Managing Contemporary Organisations.

Outcomes

Upon successful completion of this specialisation you will be able to:

- reflectively analyse and evaluate your leadership strengths and limitations to have a positive impact on student outcomes
- apply evidence-based models of leadership that have a positive impact on student outcomes
- critique, evaluate and apply evidence-based approaches to leadership in diverse contexts
- create and initiate positive approaches to organisational change.

Degree Structure

View the study plan that will enable you to lead sustainable change and innovation in a range of settings and measure its impact on student outcomes.

WELLBEING

Designed to examine evidence-based approaches to wellbeing in education, this specialisation is essential for all educators.

About

As a professional educator, you will be aware of the complex challenges institutions and systems face with wellbeing. You will also know and understand the link between student social and emotional wellbeing, and the ability to engage with learning. The specialisation focuses on evidence-based approaches to build character and promote wellbeing for students and teachers. In particular, you will focus on the factors that increase levels of student engagement and academic and personal success. Topics covered in this specialisation include character education, wellbeing education, teacher wellbeing, and positive education.

Wellbeing courses include:

- Contemporary Issues in Wellbeing Education
- Wellbeing for Educators
- Leading Wellbeing
- Neuroscience and Education
- Leading Positive Change

Outcomes

The wellbeing specialisation uniquely examines international issues in wellbeing education, wellbeing for educators and teachers, evidence-based process and theories to lead strategic wellbeing programs, and innovations that build whole community wellbeing. You will:

- apply social and emotional regulation to create personal, professional and community wellbeing
- analyse and evaluate evidence-based theoretical frameworks to create wellbeing communities
- analyse and evaluate the process to create, and maintain positive wellbeing and learning communities.

ENTREPRENEURSHIP EDUCATION

Develop your knowledge and understanding of entrepreneurship, and innovation and their impact on education, schools and systems.

About

With the rise of the fourth industrial revolution, never before has the need for entrepreneurship education been so great. Explore the rise of 21st Century skills and their impact on education. Developed in partnership with the [Entrepreneurship, Commercialisation and Innovation Centre](#) (ECIC), this specialisation examines the major issues of entrepreneurship in education leadership, theory and practice. Many educational practices remain caught in models looking back 50 years. This specialisation focuses on entrepreneurship theory, and the character and ethical challenges required by those who lead these innovations.

Entrepreneurship Education courses include:

- Contemporary Issues in Educational Entrepreneurship
- Design Thinking
- Creativity and Innovation
- eChallenge *or* Tech eChallenge

Outcomes

This specialisation is for professional educators who want to introduce design thinking, and address the main issues facing entrepreneurship in a wide range of educational contexts.

You will focus on the main opportunities and threats in the field, and the type of thinking required to develop successful entrepreneurship programs. You can also enrol in the University of Adelaide's unique [eChallenge](#). Upon successful completion of this specialisation you will be able to:

- analyse and evaluate evidence-based models of entrepreneurship education in diverse contexts
- identify the relationship between innovation, design thinking, entrepreneurship and education outcomes
- critically analyse creativity, barriers to creativity and how creativity leads to innovation
- apply the steps of design thinking methodology.

SCIENCE, TECHNOLOGY, ENGINEERING AND MATHEMATICS (STEM)

Investigate issues and opportunities facing education in the areas of Science, Technology, Engineering and Mathematics (STEM) and discover how to increase levels of student engagement.

About

The ability to critique developments in Science, Technology, Engineering and Mathematics is essential for education. The Science, Technology, Engineering and Mathematics (STEM) specialisation focuses on trends and developments in research in STEM education.

Science, Technology, Engineering and Mathematics (STEM) courses include:

- Contemporary Issues in STEM Education
- Online Learning
- Communicating Science
- Tech eChallenge

Outcomes

With a particular focus on developing greater student engagement, and participation in STEM, this specialisation enables you to :

- critique significant trends
- develop innovative and proactive approaches to STEM learning and teaching that have a positive impact on student outcomes
- implement change in a diversity of settings.

This is particularly relevant for professional educators to integrate evidence-based approaches to STEM across whole schools and systems. Upon successful completion of this specialisation you will be able to:

- analyse, evaluate and lead investigations in current issues and innovations in STEM education
- develop and lead innovative STEM practices within and beyond education communities
- instigate creative digital technology applications in schools.

“I AM GRATEFUL TO BE STUDYING AT A UNIVERSITY THAT SEES WELLBEING AS AN IMPORTANT PART OF EDUCATION AND IS TEACHING AND RESEARCHING IN THIS AREA.”

Emily Chapman-Searle
Master of Education (current student)

“Prior to moving to Adelaide at the end of last year I was teaching for 5 years in Hobart, Tasmania. I had always imagined that I would do further study and the Master of Education seemed like an opportunity to build on my experiences and learnings as a teacher. I was interested in learning more about educational leadership and how school leaders can be supported in their work.

Introduction to Wellbeing Education is a fantastic course and was the first intensive I did and it blew me away. I loved the way the course was organised and run and the energy from the lecturer was incredible. I learnt so much and was able to make many connections to my teaching and life experience. This course has given me theory and research to explain things I thought I already knew, have seen used, or used myself in a teaching context.”

ENGLISH LANGUAGE TEACHING (ELT)

Learn the latest strategies to become an effective educator of English Language Teaching (ELT).

About

The English Language Teaching (ELT) specialisation focuses on theory and practice for effective teaching of English as an additional language within the context of small group teaching in culturally diverse settings. You will be able to make evidence-based decisions about the best strategies used to teach English.

This specialisation is suitable for professionals seeking a qualification in Teaching English to Speakers of Other Languages (TESOL). If you are already working in this industry, or are planning to, then this practical program is highly suitable for you.

English Language Teaching courses include:

- Language Analysis for English Language Teachers
- Intercultural Competencies in English Language Teaching
- English Language Teaching in Practice
- English Language Teaching Methodology.

Outcomes

Upon successful completion of this specialisation you will be able to:

- demonstrate an in-depth knowledge of the systems, structure and functions of language in an English Language Teaching context
- plan and design appropriately resourced learning experiences for the needs of diverse language students
- implement planned teaching practices in relation to good practice principles applicable to an English Language Teaching context and participate in self-reflection and peer interaction
- critically review research related to the interconnectedness of language and culture including the implications of cross-cultural misunderstanding.

Degree Structure

View the study plan for professional educators who want to learn the most effective strategies to teach English in culturally diverse settings.

RESEARCH

Develop the skills to undertake education research with our internationally recognised team. You will work closely with one of our researchers on a dissertation in an area of your interest.

About

The ability of professional educators to critically interpret evidence is one of the most significant skills to improve student outcomes. The research specialisation focuses on the underpinning theories and ethical frameworks to undertake educational research.

Research courses:

- Education Dissertation Part 1
- Education Dissertation Part 2
- Research Communication
- Approaches to Quantitative Methods
- Approaches to Qualitative Research

Students intending to pursue a Higher Degree by Research should complete a 12-unit dissertation (Education Dissertation Part 1 and Education Dissertation Part 2) instead of the core course Education Major Project and an additional 6 units, as core courses, from the Research specialisation.

Outcomes

Upon successful completion of this specialisation you will be able to:

- critically examine, synthesise and interpret information
- design and implement innovative educational interventions to have a positive impact on policy and practice
- apply advanced data analysis techniques to research data
- communicate inquiry-based outcomes to stakeholders.

Degree Structure

Postgraduate entry requirements

Entry is competitive—the minimum academic entry requirement is a bachelor degree or equivalent qualification from a recognised institution.

Credit for previous study

Students who have successfully completed a qualification which allows them to register as a teacher in Australia at AQF Level 7 or higher, and who have subsequently completed two years of teaching practice, may be granted up to 24 units of advanced standing.

RESEARCH PROGRAMS AND ENTRY REQUIREMENTS

Established in 1874, the University of Adelaide has developed a reputation for research excellence and is one of the top research universities in Australia.

The University's research initiatives are aimed at delivering real results that contribute to both Australian and international social, economic, cultural and environmental wellbeing.

Employers recognise that University of Adelaide graduates' research ability and broad range of transferable skills equip them well for challenging and diverse roles in industry, government and business, as well as in research and academic organisations.

An overview of admission requirements is provided in the Research Student Handbook.

Research Programs

Doctor of Philosophy

Course duration: 2-4 years full-time

The Doctor of Philosophy (PhD) is the fundamental qualification for a research career or academic position, and is a stepping stone to a range of career opportunities. The PhD typically involves three to four years of full-time research candidature. However, students are permitted to submit their thesis after just two years if their research is complete.

Doctorates at the University of Adelaide require compulsory participation in the:

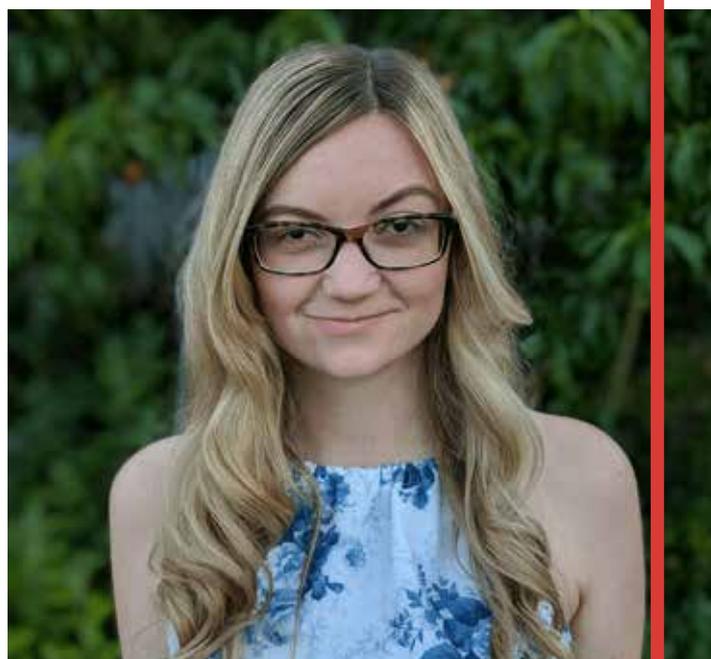

- **Integrated Bridging Program-Research (IBP-R).**

The IBP-R is conducted over one semester to help international students gain quick and effective access to the academic, linguistic and cultural conventions of postgraduate study at the University.

- **Career and Research Skills Training (CaRST) program.**

Students must complete 120 hours of CaRST activities prior to thesis submission.

In the course of completing the degree under appropriate supervision, candidates develop the capacity to conduct research independently at a high level of originality and quality, and make a significant original contribution to knowledge in their chosen discipline.

Professional Doctorate

Course duration: 2-4 years full-time

Availability: Education and nursing

Adelaide offers two professional doctorates by research in the disciplines of education and nursing. Professional doctorates combine research, project activity and advanced coursework in a single program of study, and are specifically aimed at experienced practitioners in the field.

Master of Philosophy

Course duration: 1-2 years full-time

Stream: Mixed coursework (33%) and research (67%) or 100% research where exemption from all core IBP-R courses is approved. The Master of Philosophy is offered in every University of Adelaide faculty as the primary research master degree available to prospective research students.

Master of Philosophy students are trained in research methodology and techniques, and engage at an advanced level in the critical evaluation of literature and results in the area of the thesis. Participation in the Career and Research Skills Training (CaRST) program is compulsory, and requires completion of 60 hours of activities prior to thesis submission.

International students will normally be required to undertake the mixed research and coursework stream of the program. This includes

completion of the following core Integrated Bridging Program-Research (IBP-R) courses, taught by the University's Professional and Continuing Education (PCE) arm:

- Research Processes
- Research Design
- Research Communication.

Elective coursework units may be selected from relevant master-by-coursework or honours courses approved by the school.

Students granted an exemption from all three core IBP-R courses may elect to undertake the Master of Philosophy by 100% research if desired. Participation in the full, or negotiated, IBP-R may still be required. While Master of Philosophy degrees may include an advanced coursework component, the focus is on research.

“The Master of Education offered by the University of Adelaide was the best program to support my interests in research via postgraduate coursework.

This evaluation, in addition to the high quality of instruction I had experienced during my undergraduate studies, formed my decision to continue my studies here. Currently I am employed as a Secondary School Teacher at the Australian Science and Mathematics School. Here I am involved in the content design and classroom delivery of two interdisciplinary Central Studies subjects. Alongside this formal employment I also complete volunteer work with The Smith Family as an iTrack mentor for secondary school students.

In my future, I believe this qualification will assist me to find a role associated with curriculum design and pedagogical innovation within the tertiary education sector..”

Kristy Davis, Master of Education (current student)

“I really enjoy interacting with international students from diverse communities, and learning their unique cultures gave me a sense of cross-cultural understanding during my University life.”

Wai Maung
Master of Education (2019)

PATHWAYS TO THE MASTER OF EDUCATION

PROFESSIONAL CERTIFICATE IN EDUCATION

Conducted over six months, the program is designed for education and training professionals seeking to develop their knowledge and skills in key areas. You'll complete two core courses (6 units worth of study) in one of six areas of specialisation offered in the Master of Education.

WHERE COULD IT TAKE YOU ?

You could help implement initiatives to improve school students' social and emotional wellbeing. You might help raise STEM participation in regional centres. If you're an international student, perhaps you'll lecture on 21st century skills in a higher education institution back home. You'll also have the opportunity to move on into our Graduate Certificate of Education.

WHERE COULD IT TAKE YOU ?

You could develop initiatives to improve teacher wellbeing within educational communities. You might explore ways to reduce the incidence of cyber-bullying among student cohorts. Perhaps you'll head overseas to inspire more women to address the world's grand challenges through engineering and machine learning. You'll also have the opportunity to enhance your leadership credentials still further through our Master of Education.

GRADUATE CERTIFICATE IN EDUCATION

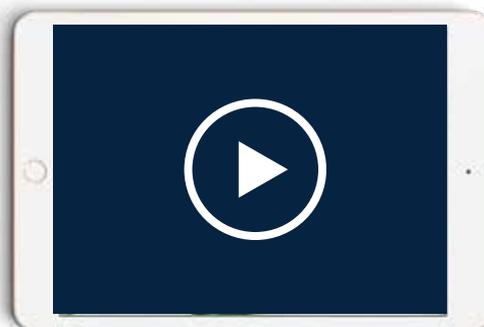

Conducted over six months full-time (or part-time equivalent), this program is for education and training professionals seeking to develop advanced knowledge and skills in key areas. It's also ideal for Bachelor of Teaching graduates seeking deeper insight. You'll complete four core courses (12 units worth of study) in one of six areas of specialisation from the Master of Education.

MASTER OF EDUCATION

The Master of Education is designed for school leaders, teachers, educational consultants and professionals working in the education sector seeking to expand their expertise and lead educational change.

This flexible degree focuses on six specialisations and electives to meet your professional learning needs.

Why should students study with the University of Adelaide?

University of Adelaide postgraduate education students collaborate with internationally renowned researchers focusing on the latest research, and who are dedicated to enhancing student outcomes.

Our students experience exceptional learning and teaching, and develop skills for research. They also join a community of like-minded scholars who are committed to leading evidence-based change in education. Adelaide's School of Education has over 100 years of research tradition. It's ranked number one in its field in South Australia, and among the top 100 globally. We connect graduates with a vast international alumni community committed to improving education for all.

Why research Education at Adelaide?

Researchers in the School of Education have a unique research focus on how education leaders create and sustain evidence-based positive learning and wellbeing environments. We are committed to wellbeing education for students, leaders and teachers.

Projects students may be interested in:

- Character education
- International education and international mindedness
- Leading change
- Positive education
- Strategic planning in education
- Teacher education reform
- Wellbeing education

ACCOMMODATION

Accommodation plays an important part in building a solid foundation for academic success.

CLICK TO SEE
STUDENT
ACCOMMODATION

Students benefit from the advantages that come from choosing to study in a city where accommodation of all types, including our University-managed accommodation, is not only accessible but more affordable than in other Australian cities.

The University recommends students adopt the **RECAS** approach to identifying an accommodation option to suit their individual needs and support a positive educational experience.

- Research all available accommodation options
- Establish a realistic budget
- Consider the value of managed student accommodation
- Avoid extended temporary accommodation
- Seek assistance from the University Accommodation Service

Students unfamiliar with Adelaide are encouraged to consider living in managed student accommodation during their first year of university. Managed student accommodation provides new students with the opportunity to become better acquainted with the city, settle into their academic program and make new friends, without having to worry about the challenges of the private rental market.

Long-term student accommodation

The University assists international students to obtain suitable longer-term housing. Students may choose any of the following options.

The University of Adelaide Village

The University of Adelaide Village is our largest of the University's student accommodation properties. The Village is home to over 400 students, who experience the safety and security of having access to University staff on-site, 24 hours a day, seven days a week.

Students need only bring their personal belongings, as furniture, kitchen appliances, utilities (including electricity), phone and Internet are all included in the accommodation fees. The only additional costs are for meals (students must cook and clean for themselves) and the on-site, coin-operated laundry facilities.

Independent residential colleges

There are five independent residential colleges situated in North Adelaide that offer accommodation to students. These independent residential colleges are privately owned and operated. They are not owned or operated by the University.

Students can contact the residential colleges directly to better understand what is available. These residential colleges include: Aquinas, Lincoln, St Ann's, St Mark's and Kathleen Lumley College.

Commercial student accommodation

Commercial student accommodation refers to purpose-built off-campus student accommodation facilities, run by private management companies not affiliated with the University of Adelaide. These facilities offer fully-furnished, self-contained apartments that give students flexibility to live alone or share with others. There are also rooms for couples.

THE UNIVERSITY
OF ADELAIDE

LONG-TERM STUDENT ACCOMMODATION OPTIONS

This table matches long-term student accommodation options to individual needs.

Accommodation types	Accommodation options	Student profile
University residential environments	University-managed student accommodation	New students to the University, without a local support network, looking to establish a solid foundation for ongoing academic success, with direct access to University learning and student support services within their residential environment.
Commercial student accommodation	Urbanest	Students looking for the convenience and comfort of packaged accommodation in a student residential environment.
Independent residential environment	Independent residential colleges	Students looking for an environment that provides a residential lifestyle with other peers who are living away from home.
Independent living	Share/rental accommodation	Students with the skills and experience to enter into tenancy arrangements and pursue an independent lifestyle.

In addition to rent, students may need to budget for additional expenses, including:

- gas
- electricity
- telephone connection (optional)
- Internet connection (optional).

Places in commercial student accommodation facilities are offered on a 6 or 12-month fixed-term lease.

It is important to note that these facilities are not directly affiliated with the University of Adelaide and students are advised to inspect them before committing.

Private rental and share accommodation

Affordable share accommodation can also be found in the private rental market, so the University offers a rental database (adelaide.edu.au/accommodation) for our students' exclusive use.

Our enrolled students can access the database from our Accommodation Service, Level 4, Hub Central, North Terrace campus, with a user name and password. The database is only promoted among the University community, and most accommodation listings are offered by people affiliated with us who would like to share their room/property with a University of Adelaide student.

Students wishing to find share or rental accommodation when they arrive in Adelaide are encouraged to book temporary accommodation in the first instance. Once in Adelaide, students should visit the

University's Accommodation Service for information on all available options and support in identifying and securing quality long-term living arrangements. Students are discouraged from sending money from offshore to secure share or rental accommodation prior to inspecting it.

Accommodation for families

Students accompanied by family members will find private rental accommodation in houses or apartments the most suitable accommodation option.

It's easier for an individual student to initially travel to Adelaide on their own to arrange suitable permanent family accommodation. Spouses and children who arrive later can then move straight in.

Arrival reception and temporary accommodation

Temporary accommodation and arrival reception services are available to commencing international students.

Eligible students can book an arrival reception service and be met by a University representative at Adelaide Airport, via a domestic or international flight. Students will then be transported to their accommodation. Eligible students who choose not to secure long-term managed student accommodation for their arrival in Adelaide may also be eligible for seven nights of temporary accommodation booked through the University.

It is important to note that temporary accommodation options arranged through the University are unlikely to be extended further than a period of seven nights due to high demand for short-term accommodation during the traditional student intake periods.

For more information on eligibility criteria, arrival reception and temporary accommodation services, contact:
